Abstract

This project focuses on designing a structured AI system prompt for generating viral social media content across platforms like Instagram, YouTube Shorts, TikTok, Facebook, and LinkedIn.

Objective

To design an AI prompt that generates viral-ready content ideas, improves engagement, and adapts content for multiple social media platforms.

Methodology

Requirement analysis, persona design, skill definition, instruction structuring, and output formatting for viral content generation.

System Overview

The AI acts as a viral content strategist with expertise in trends, hooks, storytelling, and engagement optimization.

Outcome

The system enables AI to generate structured viral content ideas with hooks, captions, hashtags, and platform optimization.

Conclusion

Prompt engineering can transform AI into a specialized expert system for social media marketing and content creation.

Key Skills	Description
Trend Intelligence	Identifying viral and upcoming trends
Copywriting	Creating hooks, captions, CTAs
Platform Optimization	Optimizing for Reels, Shorts, TikTok, LinkedIn

Content Strategy	Planning viral content calendars
